

TOMATO

INTERNATIONAL MARKETS 2021

OUR QUALITY POLICY: A COMMITMENT AT YOUR SIDE

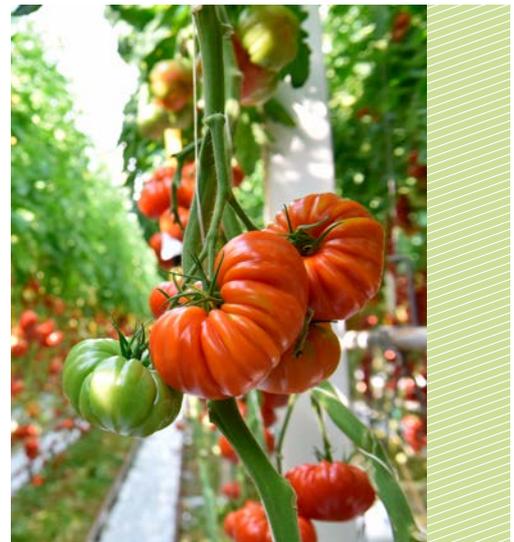

We know that the viral and parasitic pressure is more and more important and directly impacts your crops as well as your yields. In addition to emerging diseases and pests, increasingly strict sanitary rules that multiply your production constraints.

Therefore, choosing quality seeds is a crucial step.

As a professional seed company, all of our seeds are checked throughout the production chain. These regular checks allow you to guarantee seeds of constant quality and an assurance that the variety will meet your requirements.

In addition, all of our tomato varieties destined for the professional market are GSPP (Good Seed and Plant Practices) certified. This accreditation testifies to our ambition and our commitment to provide you with maximum security for your crops.

In addition, in a health context where the tomato has to face the new threat of TOBRFV, our research teams are doing everything to offer you ever more resistant varieties.

The selection efforts carried out on the resistances also allow us to present one of the widest ranges of tomato varieties in organic seeds. Indeed, our offer includes varieties available in organic in almost all typologies.

Do not hesitate to contact your reference sales representative so that they can provide you with their expertise and offer you the varieties that meet your needs for the upcoming campaign.

The standard abbreviations :

ToMV: Tomato mosaic virus	Va: Verticillium albo-atrum
TSWV: Tomato spotted wilt virus	Vd: Verticillium dahliae
TYLCV: Tomato yellow leaf curl virus	PI: Pyrenochaeta lycopersici
Pf: Passalora fulva (ex Fulvia fulva)	Ma: Meloidogyne arenaria
Fol: Fusarium oxysporum f.sp. lycopersici	Mi: Meloidogyne incognita
For: Fusarium oxysporum f.sp. radicis-lycopersici	Mj: Meloidogyne javanica
On: Oidium neolycopersici (ex Oidium lycopersicum)	HR: High/standard resistance
	IR: Intermediate/moderate resistance

The advice and suggestions, as well as the information mentioned above, are provided for guidance only and can not therefore provide a guarantee of results.

All varieties illustrated in this paper were photographed under favourable conditions ; their behaviour can vary depending on culture conditions.

+ ORGANIC

For some of our varieties, organic seeds are also available. You can easily identify them with the ORGANIC label. If you wish to obtain more information on our product range, feel free to contact your Gautier Semences Sales representative.

SNACKING

LICENSED VARIETY

SAOPOLO HF1

Fall for its crunchy fruits and sweet taste

HR ToMV:0-2/Va:0/Vd:0/Fol:0-1-2/Pf:A-E **IR** Ma/Mi/Mj

Shiny red cherry for truss harvest of 12 to 14 fruits.
Great fruit colour and vine presentation.
Excellent taste balanced between sweetness and acidity.
Average weight of 13-15 grams.
Open and balanced plant.
For heated crop production hydroponic and organic.

LICENSED VARIETY

SORENTYNO HF1

Enjoy its flavor and sweetness

HR ToMV:0-2/Va:0/Vd:0/Fol:0-1-2/Pf:A-E
IR Ma/Mi/Mj/TYLCV

Red and shiny cherry for cluster harvest of 12 to 14 fruits.
Good coloration and conservation of fruits.
Excellent taste with high sweetness and brix.
Average weight 13-15g grams.
Strong and balance plant.

LICENSED VARIETY

RIVOLO HF1

Excellent aromatic profile

HR ToMV:0-2/Pf:A-E **IR** Ma/Mi/Mj

Red cherry with strong presentation on the vine.
Very good aromatic profile.
Average weight 10-12g grams.
Vigorous and vegetative plant with short internodes.
Suitable mainly for hydroponic and heated productions.

TASTYNO HF1

Flavors that will delight your taste buds

HR ToMV:0-2/Pf:A-E **IR** Ma/Mi/Mj/TYLCV

Cherry tomato for loose harvest, combining taste quality, productivity and resistance to TYLCV.
Vigorous plant with ramified clusters. Very productive.
Round fruit, bright red, with excellent flavour.
Average weight: 12-15 grams. Excellent shelf-life.
For non-heated or heated protected crop production, in soil or hydroponic.

seeds

DELICASSI HF 1

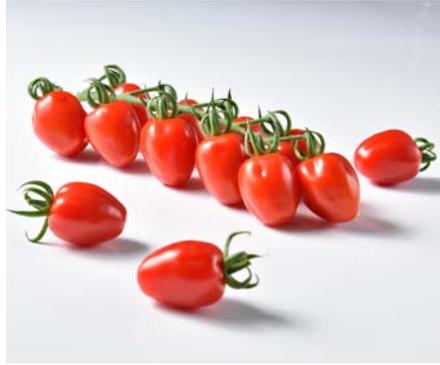

Original, delicious mini San Marzano

HR ToMV:0-2/Fol:0/Ff:A-E **IR** Ma/Mi/Mj

Mini San Marzano variety, full of flavour, for loose harvest. Vigorous plant, with excellent setting and short internodes. Cylindrical, very firm, bright glossy red elongated fruit. Excellent taste quality. Average weight 25 to 30 g.

For soil-grown and soil-less, heated and unheated protected crops.

K539* HF 1

Homogenous production and great fruit quality

HR ToMV:0-2/Fol:0

Strawberry-shaped plum cocktail type. Red fleshy fruits with a pleasant taste. Average weight 25-30gr. Ideal for cluster harvesting thanks to its very uniform ripening, very good cracking tolerance and shelf-life qualities.

K538* HF 1

Great presentation and taste

HR ToMV:0-2/Fol:0/For/Pf:A-E
IR Ma/Mi/Mj

High flavor red cocktail with a good presentation on the vine. Excellent conservation. 50-55 grams fruit weight. Really vigorous plant.

APETICIO HF 1

A flavour second to none

HR ToMV:0-2/Fol:0/For/Pf:A-E **IR** Ma/Mi/Mj

Egg-shaped cherry tomato, very tasteful. Average weight 9-12 grams. For protected crop production.

C535* HF 1

High yielding cherry plum

HR ToMV:0-2/Fol:0/Pf:A-E **IR** Ma/Mi/Mj

Red baby plum with 18-20 grams fruit weight on average. High yielding variety, adapted for loose picking in high-tech greenhouses with good heating capacity.

K611* HF 1

Premium cocktail resistant to Powdery Mildew

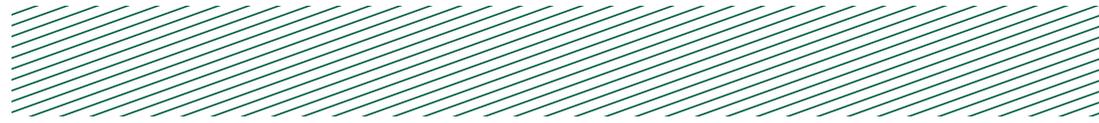

HR ToMV:0-2/Fol:0/For/Pf:A-E
IR Ma/Mi/Mj/On

Tasty cocktail with an attractive red internal color. Elegant presentation with homogenous cluster. Fruits are 50g on average.

STILL AVAILABLE

CORIZIA HF 1

Resistance to TSWV

HR ToMV:0-2/For/Fol:0 **IR** TSWV(0)

Vigorous and generative plant.
Yielding variety producing nice red, firm and fleshy fruits with a good shelf-life.
Good resistance level to TSWV.
Average weight 250-300 grams.
Suitable for heated and non-heated long crop production.

CORDELIS HF 1

High yield and powdery mildew resistance

HR ToMV:0-2/Fol:0,1/Pf:A-E **IR** On

Vigorous and generative plant very consistent through the all cycle. Very high yield potential with uniform fruit size of 200-250 grams.
Variety with powdery mildew and cladosporium resistances.
Adapted to high tech greenhouses and long cycles.
It is advised to prune the trusses at 3 or 4 fruits.

ROUND

LUTECIA HF1

High flavor and great looking loose tomato

HR ToMV:0-2/Va:0/Vd:0/Fol:0,1/For/Pf:A-E

IR Ma/Mi/Mj/On

Loose tomato with a very balanced flavor profile between sweetness and acidity, crunchy and juicy. 110 grams deep red fruits. Adapted to high tech and low tech greenhouses.

MIMOSA HF1

The eye-catching yellow tomato

HR ToMV:0-2/Va:0/Vd:0/Fol:0/For

Intense yellow round tomato suitable for both cluster and loose harvest. Very good fruit and truss presentation, throughout the season. Five or six fruits on the truss. Good shelf-life. Average weight 120 grams. Suitable for heated and non-heated crop production.

KAKAO HF1

The black tomato full of flavour

HR ToMV:0-2/Va:0/Vd:0/Fol:0

Very vigorous plant. Slightly flattened globe fruit. Dark brown with a green collar. Modern plant adapted to early sowing. High yield and taste quality. Original product with a strong differentiation. Good shelf life. Calibre: 57-67. Average weight: 130-150 grams. For protected crop production.

+ ORGANIC

TYFRANE HF1

Bush type loose tomato

HR Va:0/Vd:0/Fol:0,1

IR Ma/Mi/Mj/TYLCV/TSWV(0)

Good Seed and Plant Practices (GSPP) is an international, transparent business chain system whose purpose is to prevent tomato seed and plant lots from being infected by *Clavibacter michiganensis* subsp. *michiganensis* (Cmm). Gautier Semences has been accredited since July 2011. This accreditation covers the entire process of design and production of varieties. This accreditation demonstrates the commitment of all teams in Gautier to deliver the highest level of quality on the market.
